

The florentine Handicraft

The workshops of artisans still make Florence one of the most renowned cities in the world for the quality of its hand-made products, including semi-precious stones, paper, silk, leather and jewellery.

Furthermore, the city boasts a long tradition and a high level of professionalism in the field of restoration and the antiques trade.

The Florentine handicrafts itinerary includes a walk in the centre of town and through the popular district of the left bank of the Arno river, so called "Oltrarno", with a visit to some historical workshops, where the artisans will explain the technique of their work and will show their products.

The preferred type of crafts will be arranged between the visitors and the guide, also according to the availability of the different workshops.
